21st Century Community Learning Centers

Welcome to a New Year!

Each of our learning centers is broadening the academic and cultural enrichment components of the program to empower students to reach their full academic and social potential thereby developing strong citizens who are well prepared for college and careers.

The 21st CCLC Program will focus on reading and math fluency as well as continuing to provide homework assistance and enrichment activities that encourage positive youth development.

Please feel free to contact your students' afterschool teacher with any concerns or any additional assistance your child may need.

If at any time during the year you have suggestions for the afterschool program, please let us know. We welcome your input.

WE ARE HERE FOR YOU!

"Come See What the Buzz is all about!"

Thursday, October 26th is our "Lights on Afterschool" event for the 21st Century programs. Everyone is invited to tour the afterschool program. We would be super excited to have you!

October Bullying Prevention Month

While being kind might sound easy, it is complex. If kindness was simple, then everyone would be kind and no one would experience meanness and bullying. Imagine a world where kindness is the norm.

It is a fact that when students performed three acts of kindness per week they significantly increased their acceptance of peers compared to kids who did not perform three acts of kindness. Students who are taught kindness are more empathetic, more socially aware and connected, and receive higher grades too.

BE KIND!

It is free and the payback is good for all!
